

## **Blu Tack**

Blu Tack has lots of uses for holding parts in position while they are glued.

One day, while soldering some parts together, I reached for the first thing at hand to hold them in position - some Blu Tack.

Surprisingly, not only does it hold them in position despite getting hot but you can place the soldering iron almost adjacent without any effect.Â I'd always used masking tape for such jobs but now use Blu Tack as it can be used repeatedly. I hope this is helpful.
